

\$TROLLINU

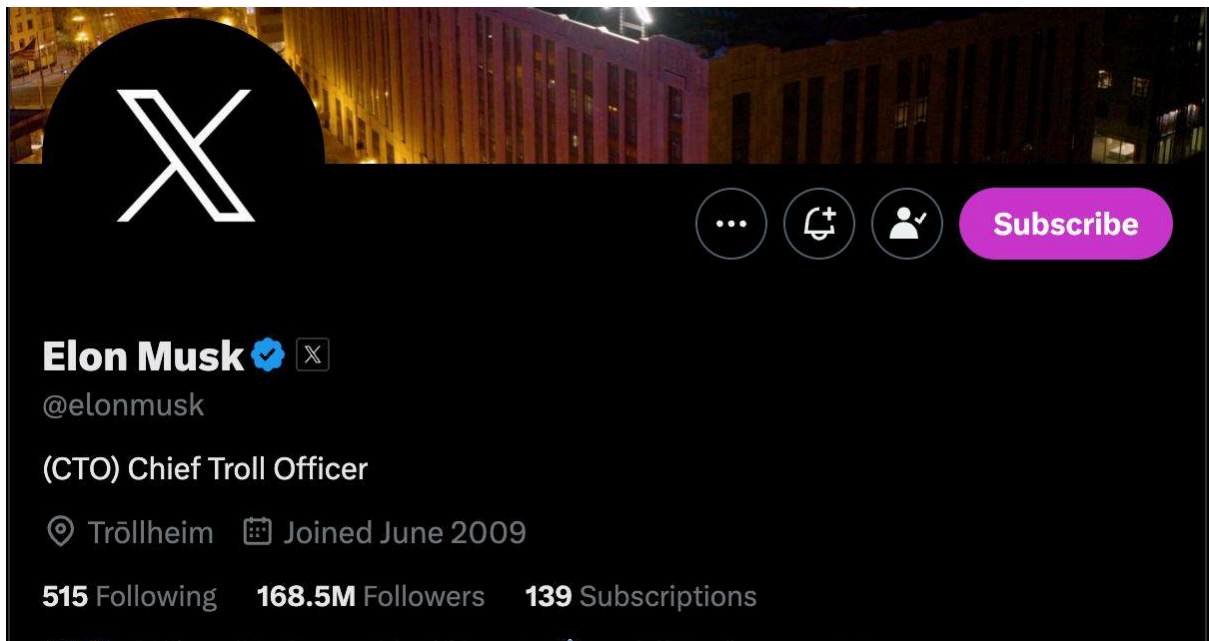

Troll-paper v1.3
27-01-2024

In the world of crypto, Troll Inu shines as a unique DeFi community project. This Troll Paper is your guide to understanding our mission, features, and the path we're patrolling..

Introduction

Troll Inu is planned to be launched in January 2024, Troll Inu (TrollInu) is a cryptocurrency project on the Ethereum blockchain. It is inspired by Elon proclaiming to be the Chief Troll Officer on his X bio as well as by the success of Inu and troll memes in general. Troll Inu is fully community funded, owned and driven.

Troll Inu aims to combine community power, internet trolling and fun memes into DeFi. Troll Inu will be governed by a decentralized community of core members. They can be found patrolling the Telegram.

A symbol, statement and movement

Troll Inu stands for free speech, traditional family values and good old fashion meme fun. Troll Inu and its community supports Elon in his efforts against the woke cancel culture.

Vision: To make *Troll Inu* a household name, more well known than all other *Trolls*.

Mission: To build a strong and fun community, create interactive memes with *Troll Inu* and get as much exposure as we can.

\$TROLLINU

Contract & tokenomics

Troll Inu's contract is launched on the Ethereum (erc20) network on Uniswap.

Contract Troll Inu: 0x27BE9b2cE3a67F95E50F42Ac9B368329BA7014c7

- Contract renounced;
- Liquidity pool 100% burned;
- "Zero" tax - besides the auto burns;
- 6.9 million total token supply.

The starting liquidity pool for Troll Inu will be a soft cap of 1 Ethereum minimum. The liquidity pool will be burnt, making it safe(r). Troll Inu will have a total token supply of 6.9 billion tokens. Troll Inu's contract will be renounced after launch and the launch tax will be set to 0/0 for all transactions. The launch tax will be to deter sniper bots from entering and if they do so they will be taxed. All taxes gathered from launch will be used to cover expenses as well as for marketing purposes.

Etherscan:

<https://etherscan.io/address/0x27be9b2ce3a67f95e50f42ac9b368329ba7014c7>

Community fund raise

Wallet for the liquidity fundraise for Troll Inu:

<https://etherscan.io/address/0x6EbC0e179D79F8d270058BdF4C3c78F9309c3ad0>

People who helped raise funds will be airdropped back:

- 0.05 eth - 0.5% token supply;
 - 0.10 eth - 1% token supply;
 - 0.15 eth - 1.5% token supply.
-
- Soft cap will be 1.5 Eth
 - Hard cap will be 3 Eth

A 1 Ethereum minimum will be used for liquidity and burnt. The rest will be used for the initial marketing push.

The fundraise wallet will also function as the deployer and contribution/marketing wallet.

Development

- Community development: This will happen over time, organically and progressively, by means of our dynamic marketing strategies and community efforts. As the community grows so will our team and development rate.
- Team development: At this moment Troll Inu's team is still growing as well. The team consists of a core foundation of holders/developers doing this with and as a community effort. Each is active in a different timezone. More community members will be asked to become mods if they show dedication to the project, community, culture and our cause.
- Liquidity development: The starting liquidity during deployment was 1 ethereum and will be burnt. Troll Inu will explore more ways to strengthen and diversify the liquidity pool by adding liquidity and pairs.
- Partnerships development: Troll Inu will actively seek partnerships with people involved in the crypto space, be it with developers/other projects/influencers.

Utility development

Utility development references to the "intrinsic value" of the token/project. Troll Inu right now is a symbol and statement to raise awareness against the woke cancel culture and stimulates making wholesome fun out of it. Troll Inu is deflationary, meaning its token supply will become more scarce over time. Additional utilities for the token like a Troll Inu swap and ecosystem will be built over time.

Troll Inu starts by making the project a DAO. Whereby holding over 0.5% gives people more governance regarding further utility development and marketing.

Troll Inu AI & NFT development

Troll Inu will develop a Troll Inu AI bot. This bot will be used for entertainment, fun and informative purposes.

Troll Inu in general will be known for staying relative and playing into controversial and actual events regarding companies/institutes that operate against free speech, have gone woke and or try to manipulate the narrative. Troll Inu is of the opinion that DeFi and AI will be the future and thus Troll Inu will adapt with the times.

The Troll Inu AI will be developed and upgraded over time.

Troll Inu will also develop NFT's (Non Fungible Trolls) with different side characters as part of the Troll Verse. Unlike other NFT's Troll Inu's will be more than just collectibles, they will be playable in the form of a Triple Triad card game. This way NFT's can be minted, but also won through gamification. There will be different kinds of rarities with different stats as well as legendary NFT's.

The NFT's will be developed and expanded upon over time.

\$TROLLINU

Marketing strategies

Troll Inu will implement different marketing strategies.

Abandoned projects: Troll Inu will actively search for abandoned projects and bring those communities to Troll Inu.

Partnerships: Seek out partnerships with crypto influencers, work relations with other projects and developers. Troll Inu will also actively seek out partnering with Troll, Chief Troll Officer, Go Fuck Yourself as well as Grok and other Troll/anti-establishment projects.

Community power: Keeping our community members active and by facilitating them with the means to increase our exposure through daily tasks by means of our social media presence.

Social media: Troll Inu will make use of its social media for troll raids as well as feel good stories and memes for marketing purposes. In the Telegram daily updates and shill messages and tweets will be provided for.

Planned Ama's: Troll Inu will seek out and participate with AMA's on other platforms, such as spaces on X, and will hold voice chats on the main Telegram. This will keep the community informed and updated. Troll Inu will be able to gather feedback, receive suggestions, share experiences and will be able to improve community bonding.

Promotion: Troll Inu will actively keep working with our community and partners. Focus on building out and maintaining our brand, network and relations.

Special/unique promotional strategies can and will be implemented as well. Troll Inu will aim to get a promotional billboard on the Tesla road in Austin, Texas (near the Tesla Gigafactory). Also plans are in the make for animations as well as short story cartoons. Troll Inu will even aim to create its own merch to further its brand. Troll Inu will be unique and interactive in its approach regarding promotion and creative marketing.

Educational: Troll Inu will be educational for children as well as adults. It will teach about DeFi, AI, the first principle approach and will stimulate critical thinking. This will be done in a fun and entertaining way.

Elon Musk: “*The most entertaining outcome is the most likely.*”
